PLANET OF DEATH

Adventures are games in which you explore and discover a strange new world without leaving the comfort of your chair. The computer will act as your puppet eyes and other senses.

You instruct the computer using short sentences, usually verb noun, and providing the computer understands it will obey your command. If the computer does not understand then you're wasting the command.

In each location you may find objects which you can manipulate and use in further locations to help you complete your adventure. When entering your command you may use the DELETE key to delete any errors.

In this adventure you find yourself stranded on an alien planet. Your aim is to escape from this planet by finding your new castle and completing Space Ship.

You will meet various hazards and dangers in your adventure some of which it will be in your power to overcome, others will be your undoing.

GOOD LUCK !!
